

# Sohanur Rahman

## Backend Developer

Dedicated full stack developer with a vast array of knowledge in front-end and back-end technologies and best code practices. I am dedicated to perfecting my craft by learning from more seasoned developers, remaining humble and continuously making strides to learn all that I can about development. Being a CS student I studied data structure, algorithms and I believe that my understanding of problem solving are also skills that have and will continue to contribute to my overall success as a developer.
